

iRaaS (iNTELLIGENT Recovery as a Service)

Enabling every organization with Quick, Affordable & iNTELLIGENT Recovery from any small & large disasters.

iNTELLIGENT Recovery as a Service (iRaaS)

Enterprise class iNTELLIGENT Recovery solution for organizations of all sizes.

When disaster strikes, it can hinder productivity & cause downtime that can cripple the organization. Financial losses due to IT Failures total to about \$6.2 trillion worldwide. On an average businesses lose about \$5000 per minute due to an outage.

iRaaS comes to your organizations rescue in such situations providing an Enterprise-class iNTELLIGENT recovery solution with High Availability, Reliability, Flexibility and Affordable Costs to protect your critical data and maximizing your ROI within short span of time.

How Perpetuuti iRaaS Works for you?

Replicating and Recovering your mission-critical data to either a third party datacenter or to your own secondary datacenter (the choice is yours)... iRaaS comes with defined SLAs as per the package covering Physical, Virtual or Hybrid IT environment to ensure your IT services are back up and running according to the stipulated recovery time objective (RTO), keeping downtime to a minimum.

iRaaS is underpinned by our acclaimed Service Management where our team of experts monitor and manage your Applications 24x7, providing you with a fully managed recovery service for your critical IT services.

iRaaS is available on a flexible monthly cost model, allowing you to avoid investing in costly infrastructure that you may not use to its full potential in terms of Computing Resources.

Build Disaster Recovery your way with iRaaS to meet your organization's needs:

Enterprise Class Service

Designed from the ground up to be secure, available and flexible.

End-to-End Service Levels

Our strict SLAs ensure your critical data and IT services are restored in a matter of minutes.

Quarterly Service Reviews

Regular DR drills testing, ensuring the DR readiness is always on top form.

Security

Triple DES Security ensures your information is in safe hands.

Service Assurance

We schedule two DR tests per year, to comply with regulatory requirements and ensures your IT services remain ready.

Affordable Cost

Avoid investing in dedicated infrastructure, Perpetuuti RaaS is available on a flexible monthly cost model on a pay-as-you-go basis that saves 60% of your IT costs.

Total Coverage

24x7 Service Desk - giving you access to our award winning technical team.

Enterprise Technology

True Enterprise Technology from the world's leading RaaS providers delivering availability and performance within agreed Service Levels.

True Flexibility

Scale up/down to match your IT budgets.

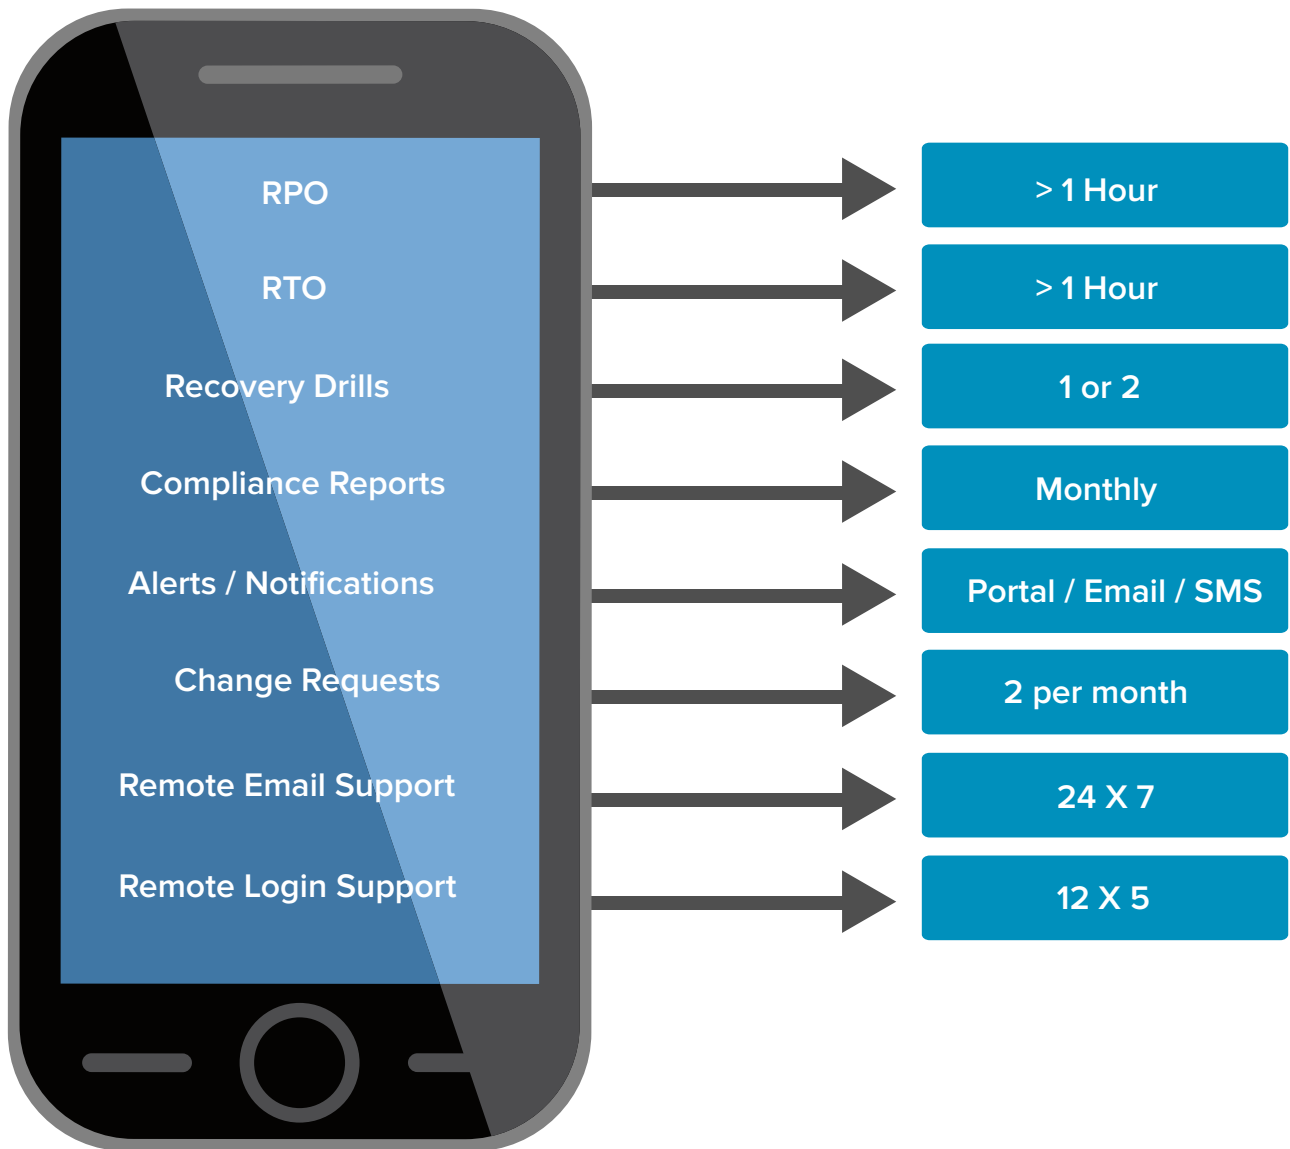

Key iRaaS Deliverables

Perpetuuti iRaaS Pricing

Pricing for end customers is based on the number of DB & App Instances being protected by iRaaS. Price mentioned is the transfer prices to the partner and does not include the pricing component for the required infrastructure and operations. It is also assumed that every DB & App Instances is considered as a pair between Production and DR sites. Following are the categories of iRaaS Protection:

Product Base

Windows DB Instance

Windows App Instance

UNIX DB Instance

UNIX App Instance

DataSync File Replication - Physical

DataSync Block Replication - Virtual

PLATFORM		OS	DATABASE	REPLICATION			CLOUD
Physical	Virtual			Native	Storage	3rd Party
