

Smartly Handle Office 365 Accounts with O365 iBoT from Perpetuuti's Plug-and-Play iBoT Store

Deleting Account. Blocking Account.
Password Reset. Removing O365 License.

What does the O365 (Office 365) iBoT do?

Having an intelligent RPA solution being part of the Office 365 suite could be a great improvement for the productivity of the business teams across the organization.

The O365 iBoT performs various functions related to O365 such as deleting an account, blocking an account, resetting a user's password and removing an account's O365 enterprise license. Key use case for this iBoT is to help the HR with employee exit process.

The O365 iBoT first logs in to the specified system and then it deletes the accounts which are not required. It also performs the task of blocking an account, resetting the passwords and removing the accounts from O365 licenses as per the defined business rules.

How is Perpetuuti's O365 iBoT Unique in the Market?

By smartly automating manual tasks at a fraction of the human equivalent, O365 iBoT can deliver an immediate cost saving of 60-80% and free up your knowledge workers for more value-added tasks.
