

# Reimagine Your Supply Chain Operations with Supply Chain Management iBoT from Perpetuuti's Plug-and-Play iBoT Store

Enhanced Cycle Time & Agility.

Increased Capacity & Asset Efficiency.

## What does the Supply Chain Management (SCM) iBoT do?

SCM iBoT offers businesses an opportunity to provide customers with effective and efficient methods to manage inventory, sales audit, booking of orders, tracking of shipment, complaint registration (using SCM ChatiBoT) and vendor management. Supply chain stakeholders can adapt to demand and scale up operations more quickly due to automated processes with SCM iBoT.

## How is Perpetuuti's Supply Chain Management iBoT Unique in the Market?

SCM iBoT relies on complex algorithms and pattern recognition guided by self-learning to make predictions and support decision-making. The incorporation of cognitive and knowledge-based capabilities with RPA allows SCM iBoT to act like human employees.

### End-to-end supply chain visibility with AI

Connect and view data across disparate sources

### Predict and mitigate disruptions before they happen

Reduce mitigation time from days to minutes

### Optimize supply chain execution

Curb recurring supply chain challenges faster and easier

Discover costs savings and hidden opportunities

### Easy Integration

Easy Integration with Existing Systems to Get Going in Days

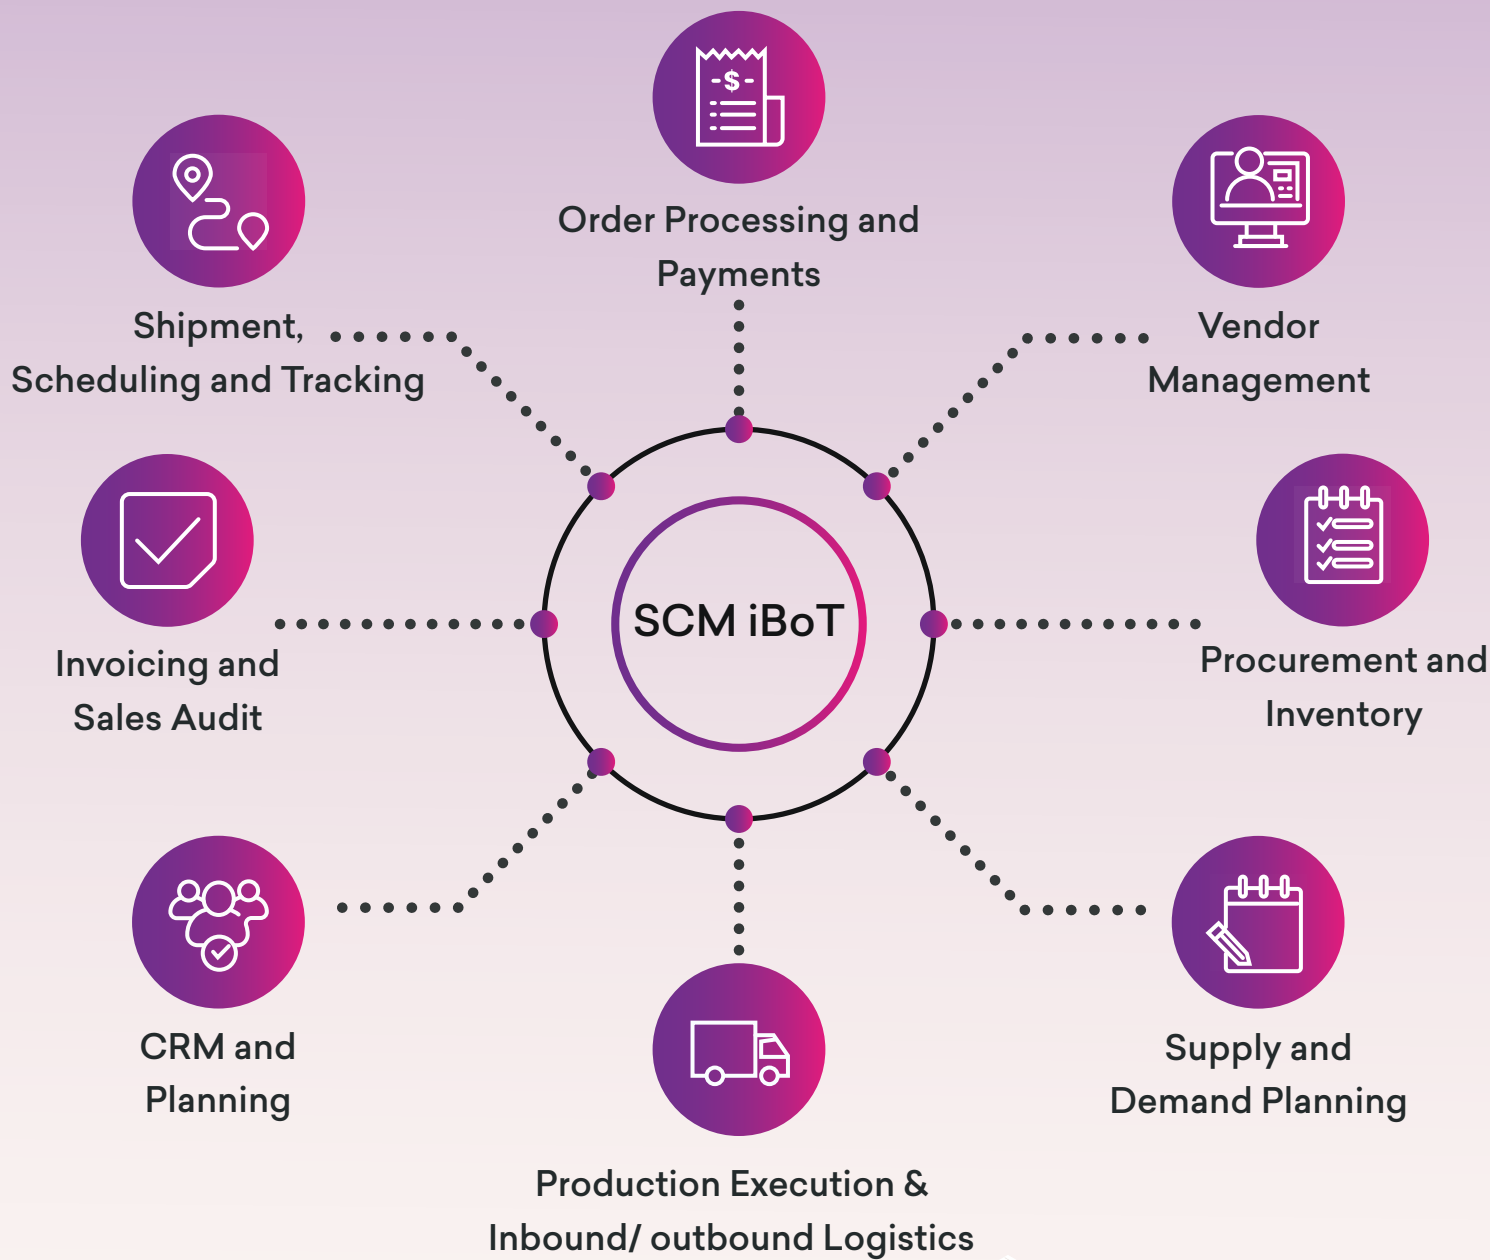

### Ease of Use

Ease of Use & Configuration Without Technical Support

# Top Supply Chain Management Operations to Automate with the SCM iBoT

## How SCM iBoT Simplifies your Supply Chain Operations?

Eliminates the manual input of POs and other administrative tasks

Responds to supply chain requests for proposals, quotes and questions

Increases ROI by bridging the gap with suppliers

Eliminates human error and duplication in the supply chain process

Establishes new levels of engagement through the supply chain

Automates B2B processes without costly developments

Seamlessly integrates with other supply chain systems and tools

Analyzes repeatable tasks to identify supply chain inefficiencies

## Setup Process

### Prerequisites/ Inputs

- ⇒ Testing data to build the model such as Microsoft Excel, details of the SCM and all the business rules.
- ⇒ Other mandatory fields.
- ⇒ Hardware and Software requirements – SCM iBoT, Server and Av3ar Control Room as per the Av3ar prerequisite document.

### Implementation

- ⇒ Download and Install the SCM iBoT, Server, and Av3ar Control Room in your environment (Read the Av3ar Installation guide).
- ⇒ Configure the Server and Bot Details.
- ⇒ Map the workflow to the Job.
- ⇒ Trigger the Job.
- ⇒ That's it - Now the bot is ready to get going.

Deploy the SCM iBoT in **10 Days** with our Implementation Support
